## STRENGTHS

- **Analytical Thinking**
  Leveraged analytical thinking during data assessment projects, leading to significant clarity in reporting. Team members turned to me for constructive feedback.
- **Collaboration**
  Strong teamwork mindset established mutual trust with cross-department teams. Celebrated jointly achieved milestones, fostering a positive work culture.
- **Problem Solving**
  Employed creative problem-solving approaches to tackle unexpected challenges, often becoming the go-to resource for innovative ideas.
- **Adaptability**
  Adapted quickly to new tools and methodologies introduced during projects. Colleagues noted my ability to find solutions under shifting environments.
- **Communication**
  Crafted clear updates for project stakeholders, earning praise for making complex ideas accessible and engaging.

## SKILLS

Data Analysis  Programming  SQL

Python  Excel  Google Analytics

Agile and water fall Methodology

Data Visualization  HTML  CSS

JavaScript, React , vue

Flutter  and Dart

Project Management

Software Development

## SUMMARY

Driven software developer with two years of experience in data analysis, programming, and technical tasks supporting problem-solving and system improvement. Expertise lies in utilizing technology to enhance efficiency and deliver actionable insights. Strong background in developing analytical workflows with tools like Excel and Google Analytics, effectively transforming complex data into understandable metrics vital for decision-making. A proactive approach has enabled successful collaboration across teams, fostering solutions aligned with business needs. Passionate about leveraging tech-driven strategies for growth and well-informed choices.

## EXPERIENCE

### Software Developer

Tech Innovations Ltd.  January 2025 - Present  Addis Ababa, Ethiopia

As a Software Developer, contribute to various software projects by delivering quality coding and analysis of business requirements. Foster collaboration within cross-functional teams to ensure alignment on development processes and objectives.

- Developed software features based on user requirements and functional specs.
- Collaborated with team members in an Agile environment, participating in daily stand-ups.
- Created automated testing scripts that improved overall testing efficiency.
- Analyzed application performance and implemented optimizations.

### Data Analyst Intern

Innovative Data Solutions  June 2024 - December 2024  Remote

Executed data analytics tasks to assist stakeholders in understanding key trends. Leveraged data visualization tools to provide insightful reports paired with necessary recommendations.

- Extracted and cleaned data using SQL and Excel for comprehensive analysis.
- Presented findings through visual dashboards, enhancing stakeholder reporting.
- Assisted in implementing data collection process improvements.
- Conducted training sessions for team members on data processing best practices.

## PROJECTS

### Customer Relationship Management System  April 2024

Developed a customer relationship management system utilized by sales teams to streamline clien interactions and track communications. Incorporated feedback loops, ensuring continuous produc enhancement.

### Fleet Management System – Haramaya University

Developed a fleet management system for Haramaya University to monitor vehicle usage, track assignments, and manage operational records. The system improved resource utilization, enhanced transparency, and supported administrative decision-making through organized data management.

### Employee Attendance Management System

Built an employee attendance management system to record, monitor, and report staff attendanc The solution streamlined attendance tracking, reduced manual record-keeping, and provided summarized reports to support workforce management and administrative efficiency.

### Business Intelligence Tool January 2025

Designed a tool facilitating the extraction and visualization of business data. Enabled users to generate comprehensive reports for informed decision-making.

## MY CAREER

- 1.5 Years as Junior Software Developer at Tech Innovations Ltd.
- 6 Months as Data Analyst Intern at Innovative Data Solutions

## LEADERSHIP & AWARDS

- Awarded 'Best Innovator' at Tech Innovations Ltd. for outstanding contributions to project development.
- Recognized for exemplary research work at Haramaya University, contributing valuable insights into IT integration.

## EDUCATION

**Bachelor's degree in Information Technology**

Haramaya University  GPA: 3.6  2025  Addis Ababa, Ethiopia

**Coursework:** Data Management, Software Development, Statistics, Business Analysis

## CERTIFICATIONS

- Certified on Software Development 2024
- Leadership skill Certification  2025

## TECHNICAL SKILLS

- **Development Tools:** Visual Studio, GitHub, Eclipse,Android studio
- **Data Processing Tools:** Excel, SQL Server, Tableau
- **Programming Languages:** Python, Java, C#,Javascript,Dart,flutter
- **Frameworks:** Django, Flask, React, Vue
- **Database Management:** MySQL, PostgreSQL, MongoDB
- **Project Management Tools:** Trello, Asana, Jira
- **Version Control:** Git, GitHub, Bitbucket
- **Cloud Platforms:** AWS, Azure, Google Cloud
- **Testing Tools:** Selenium, JUnit, NUnit
- **Analytics Tools:** Google Analytics, Tableau, Power BI

## PROFESSIONAL AFFILIATIONS

- Member of the Ethiopian Software Association, promoting networking and professional growth.
- Volunteer at Code for Good charity, teaching programming skills to underprivileged youth.
